

RUN

Start bot (leave window open):
cd C:\Users\hp\OneDrive\Documents\Claude\Projects\Tradebot
python run_all.py
Stop all Python processes:
Get-Process python | Stop-Process
Dashboard:
http://localhost:3001
Tail log (Ctrl+C to exit):
Get-Content tradebot.log -Tail 50 -Wait

INSPECT STATE

Full snapshot as JSON:
Invoke-RestMethod http://localhost:3001/api/snapshot |
ConvertTo-Json -Depth 4
Stats only:
(Invoke-RestMethod http://localhost:3001/api/snapshot).stats
Tracked wallets (readable table):
Invoke-RestMethod http://localhost:3001/api/wallets |
Format-Table address, last_seen, win_rate, notes -Wrap
Open positions:
Invoke-RestMethod http://localhost:3001/api/positions |
Format-Table token_symbol, entry_price_usd, opened_at
Recent signals:
Invoke-RestMethod http://localhost:3001/api/signals |
Format-Table created_at, signal_type, token_symbol, trigger_count

DISCOVERY SCRIPTS

Find new wallet candidates (60-180s):
python find_wallets.py
Find zombie token candidates:
python find_zombies.py
Prune dead wallets (report only):
python prune_wallets.py
Prune and actually delete:
python prune_wallets.py --apply

BULK-ADD TOP 8 WALLETS FROM CSV

Run after find_wallets.py; bot must be running:
Import-Csv "candidates.csv" |
Where-Object { [int]\$.bot_score -eq 0 } |
Sort-Object { [double]\$.composite_score } -Desc |
Select-Object -First 8 | ForEach-Object {
\$b = @{address=\$_.address;chain="solana";
notes="fw-\$(Get-Date -Format yyyy-MM-dd)"} |
ConvertTo-Json -Compress
Invoke-RestMethod -Method Post ` -
-Uri http://localhost:3001/api/wallets/add ` -
-ContentType "application/json" -Body \$b
}

RESET / CLEANUP

Clear open positions and pending signals:
python -c "import sqlite3; c=sqlite3.connect('tradebot.db');
c.execute('DELETE FROM open_positions');
c.execute('DELETE FROM signals'); c.commit()"
Drop invalid (truncated) wallets:
python -c "import sqlite3; c=sqlite3.connect('tradebot.db');
n=c.execute('DELETE FROM smart_wallets
WHERE LENGTH(address)<32').rowcount;
c.commit(); print(f'Deleted {n}')"
Full nuke (lose everything):
Get-Process python | Stop-Process
Remove-Item tradebot.db, tradebot.log
python run_all.py

SCHEDULED TASKS

Status (last run, next run):
Get-ScheduledTask -TaskName "Tradebot-find-wallets-daily" |
Get-ScheduledTaskInfo
Run now (test):
Start-ScheduledTask -TaskName "Tradebot-find-wallets-daily"
Remove:
Unregister-ScheduledTask -TaskName
"Tradebot-find-wallets-daily" -Confirm:\$false

GOING LIVE (REAL MONEY)

Install live-trading libraries:
pip install solders solana
Edit .env:
SOLANA_PRIVATE_KEY=<base58 private key>
PAPER_TRADING=False
Edit config.py: start tiny:
TRADE_SIZE_SOL = 0.01
Restart:
python run_all.py
Going back to paper:
Edit .env: PAPER_TRADING=True; restart

CONFIG DEFAULTS (CONFIG.PY)

WALLET_TRIGGER_COUNT	= 6
WALLET_POLL_INTERVAL_SEC	= 30
WALLET_LOOKBACK_MINUTES	= 10
MAX_OPEN_POSITIONS	= 10
TRADE_SIZE_SOL	= 0.1
STOP_LOSS_PCT	= 15.0
TAKE_PROFIT_PCT	= 50.0
SLIPPAGE_BPS	= 300

TROUBLESHOOTING

"python not recognized": install Python, tick Add to PATH.

"invalid address" from Helius: drop truncated wallets (left col).

No WebSocket: pip install websockets

Too many signals: bump WALLET_TRIGGER_COUNT in config.py.

Zero signals after 24h: lower WALLET_TRIGGER_COUNT by 1.

Birdeye 401 spam: leave BIRDEYE_API_KEY blank in .env.
